Sustainability
Setting a standard for environmental responsibility

Our products feature energy-efficient design. Quick Start-Up Technology enables imaging systems to start up quickly, while reducing energy consumption when in sleep mode.

High-speed duplex printing/copying allows for duplex copying at the speed of one-sided copying help users conserve resources.

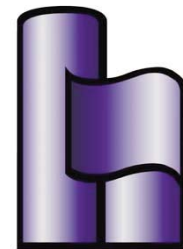

Everything we do — from product planning, development and production, to sales, logistics, use, recycling and disposal — takes conservation into account. By integrating our environmental management system throughout our operations, we demonstrate our commitment to protecting the environment.
